HARSHITH VARMA RUDRARAJU

■ +1 (205) 586-8488 | ■ 1644 12th St S, Birmingham, AL 35205 | ■ hrudrara@uab.edu | LinkedIn | Portfolio |

EDUCATION

University of Alabama at Birmingham (UAB) — Birmingham, AL
Master of Science in Data Science | Aug 2024 – Jun 2026 | GPA: 3.88/4.0
B. V. Raju Institute of Technology (BVRIT) — Hyderabad, India
Bachelor of Technology in Computer Science and Business Systems | Oct 2020 – May 2024 | CGPA: 7.57/10
Relevant Coursework: Machine Learning, Computer Networks, Analysis of Algorithms, Object-Oriented Programming, DBMS with SQL

EXPERIENCE

AI Engineer Intern — AriesView | Sep 2025 – Present
• Collaborated with AI researchers and engineers to develop and test LLM-based pipelines for extracting structured data from complex real estate and financial documents.
• Conducted experiments on AI models to improve underwriting automation and lease abstraction accuracy.
• Contributed to the design of retrieval-augmented generation (RAG) systems and scalable evaluation frameworks.
• Built Power BI dashboards and analytical reports for financial data analysis, supporting insights for real estate private equity and investment decisions.
Data Analytics Intern — UAB Athletic Performance, University of Alabama at Birmingham (Birmingham, AL) | Sep 2025 – Present
• Developed data integration pipelines to unify athlete performance metrics from multiple software platforms.
• Learned and implemented analysis workflows using 2–3 sports performance programs.
• Designed tools, dashboards, and data visualizations for performance tracking and decision support.
• Conducted statistical analysis and developed actionable insights for optimizing player performance across teams and sports.
• Presented analytical results and recommendations to coaching and performance staff.

TECHNICAL SKILLS

Programming: Python, C, familiar with C++
Tools & Platforms: IntelliJ IDEA, Excel, Visual Studio, Power BI
Operating Systems: Windows, Linux (Ubuntu)
Web: HTML, CSS, XML
Concepts: Machine Learning, TensorFlow, Android Development (beginner), Blockchain Fundamentals

PROJECTS

Video Frame Analysis and Face Clustering | Python, OpenCV, DBSCAN
Built a frame extraction and clustering system to identify unique faces from video sequences. Applied Haar Cascade classifiers for detection and DBSCAN for clustering.
Lip Movement to Text Conversion | Deep Learning
Designed a neural network model to translate lip movements into text for non-verbal communication and speech recognition applications.
Conversational Chatbot | Python, OpenAI API
Created a context-aware chatbot using OpenAI's NLP capabilities to enhance automated interactions.
Sales Performance Dashboard | Power BI, DAX, Power Query

Developed an interactive Power BI dashboard integrating CRM and ERP data for a phone repair shop, reducing manual reporting time by 70%.

Financial Data Analysis Dashboards | Power BI, SQL, Python

Developed dashboards for financial performance tracking and investment analysis. Automated data pipelines and integrated APIs for continuous data refresh and accuracy.

CERTIFICATIONS

Introduction to Blockchain — TCS
Python (Basic Skills) — HackerRank
Python Data Structures: Stacks, Queues, Deques — LinkedIn Learning
Flipkart Grid 4.0 Software Development Challenge — Unstop

LEADERSHIP & ACTIVITIES

Organized “2K Run” fundraiser for NGO Street Cause.
Led planning and execution of “DECRYPT”, a national tech symposium at BVRIT.
